

# Milestone 1 Week 2 — Team 1

## Progress Report

### Objective

Ensure that during Scrum Prep, the project has a clear and organized summary of what Team 1 worked on this week.

---

### What the Team Accomplished This Week

- The team has begun initial domain acquisition
  - Research is currently being documented to prep for submission before sprint end.
- 

### Tasks Completed / Issues Closed

- None yet but the following are underway
  - [Domain Terminology Gathering](#)
  - [Design Database Schema](#)
- 

### What Is Currently In Progress

- Research for domain acquisition and initial documentation
  - [Domain Terminology Gathering](#)
  - [Design Database Schema](#)
  - Designing the feature's pages according to our initial assumption of what the platform will have
- 

### Blockers or Challenges

- Project documentation base structure is still not available to facilitate colaboration so any work done is still fragmented
-

# Plans for Next Week

- Complete initial research
  - Design initial wireframes for the features pages
  - Begin base implementation of the project, because our feature is the core of the app
  - Start preparing a demo for the milestone video
- 

# Documentation Links

- This is pending for when the documents are uploaded and accepted via their corresponding issues
-
