

Objective

Ensure that during Scrum Prep, the project has a clear and organized summary of what Team 4 worked on this week and what we will work on in future weeks.

What the Team Accomplished This Week

- Identifying the right tasks to focus on currently and determined the first implementations for the project.
- Begun implementation of dashboard and report designs and features.

Tasks Completed / Issues Closed

- Issues are currently in progress.

What Is Currently In Progress

- [Design Report Screens with Filtering System Interface](#)
- [Define User Navigation Flow from Dashboard to Reports](#)
- [Exporting Reports to PDF Format](#)
- [Implement Materialized Views for Reporting Optimization](#)

Blockers or Challenges

- N/A

Plans for Next Week

- Finish the initial features for the dashboard and report screens.
- Complete the initial design of the Dashboard and Features.
- Document our implementations for the AsciiDoc documentation.

Plans for Milestone 2 (Subject to Change):

- Refine existing reports with advanced metrics and combined filters, develop new reports integrated with data from other Teams and Supabase, and implement UI/UX improvements (personalizable dashboard, dark mode, animations).

Documentation Links

- Soon, the research will be made available to be viewed in the main branch. All working issues have their links posted above in the document.
