

Milestone 1 Week 3 — Team 1

Progress Report

Objective

Ensure that during Scrum Prep, the project has a clear and organized summary of what Team 1 worked on this week.

What the Team Accomplished This Week

- Continued documentation of core findings of the domain
- Begun implementation with sample feature and directory structures
- Preliminary database schema design

Tasks Completed / Issues Closed

- [Domain Terminology Gathering](#)
- [Design Database Schema](#)
- [Tech Stack Base Incorporation](#)
- [Needs and Pain Points](#)
- [Domain Attributes Clasifications](#)
- [Consistency and Hierarchy Standards](#)

What Is Currently In Progress

- [Flexible Item Wireframes](#)
- [Core Entities Supabase Implementation](#)
- [Barcode Scanning Package Research](#)
- [Domain Rough Sketch](#)

Blockers or Challenges

- Difficulty coming up with issues
- Difficulty deciding what aspects of flutter to incorporate into the project to not over complicate things for the members

Plans for Next Week

- Design initial wireframes for the features pages
- Start preparing a demo for the milestone video

Documentation Links

- Available throughout pull requests and issues mentioned above
